RE: Declaration of product obsolescence

The Elektra range of Variable Message Signs were withdrawn from sale in October 2019.

Due to component obsolescence issues, we are required to declare the Elektra product range obsolete with immediate effect.

Whilst we are now unable to offer full maintenance support (from the date of this letter), where possible, we will aim to provide a repair service for Elektra parts. Guidance should be sought from the repair centre in Poole to ascertain whether a repair is possible, prior to returning any parts.

Please contact your local Field Service centre or your Regional Sales Manager should you require support with this or to discuss this notification further.

Best regards,

Gavin Trimnell
Sales Director
